I Love Blue Birds and I Cannot Lie

Bruce Ackerman

What is your favorite Blue Bird? I mean a Bird that is Blue. I am monitoring some of the 50 Bluebird nest boxes at Ridgway State Park. Checking in on each box once a week, from March to July. Some of the first clutches have already fledged this year, by mid-May. I love our Mountain and Western Bluebirds! You could come along with me and see some baby Bluebirds.

For some reason, we have LOTS of names for colors of Blue in Birds. In the US, we have Bluebirds (3 species), Blue Jays (8 species!), plus herons (2), teal, gnatcatcher, hummingbird, and warblers (2), all with BLUE in their names. Add to that Blue-Gray, Purple, and Violet species that we have in the US. But here are some colors of BLUE in bird names, that not everyone would know - Indigo, Lazuli, Cerulean, Berylline, Hyacinth, Sapphire, Azure, Amethyst, all are in bird names in the US or elsewhere in the world.

Blue-colored Feathers are not actually Blue, but the color comes from Refraction (same as for Rainbows and Prisms). The physical structure of the feather causes it to refract light as blue wavelengths. Some species have feathers that also reflect Ultraviolet light, which birds can see but humans cannot. That makes their feathers even more spectacular. *Continued Page 5*

Presidents' Message

To paraphrase the Beatles, *we get by with a lot of help from our friends.*

One of the joys of being Co-Presidents has been to see the growing collaborations in BCAS to spread the awe of birdwatching and the education and camaraderie it brings.

We have had two events in collaboration with Colorado West Land Trust (CWLT). The first was Cranes and Cocoa in December, where CWLT brought the cocoa (and the conserved land), and BCAS brought the cranes. Well, the cranes graced us with their presence in the field next to the viewing area, and we provided the talking heads and the scopes. And then this Spring, CWLT gave us an opportunity to tour one of their conserved properties, with Bruce Ackerman providing the bird commentary and animal tracks identification. It is wonderful to see what can flourish when land is conserved and protected.

We continue to grow our connection with Friends of Youth and Nature (especially with Anne Janik) by participating in their activities to reach kids and families with the joys of being outdoors. Carrie Krickbaum worked with Ridgway schools to help first graders build bluebird boxes and talked about the best habitat for those boxes. Sheryl Radovich and Carol Howe have some summer programs scheduled at Ridgway State Park and are planning educational activities during fall bird banding time. And Carol Howe and Sallie worked with the Montrose Library on a migration program. The partners help share the load of program development, promotion, and reaching new audiences.

And everywhere we go, folks know BCAS and want to work with us. So please join us to engage with our partners. There are lots of big and little tasks that bring us joy, help spread the awe of birds and protect the places birds (and all of us!) need. Respectfully,
Sallie Thoreson
Co-president

Editor's note: *I highlighted every opportunity to volunteer listed in this newsletter in the color turquoise, so they stand out! As programs grow, our need for help grows!*

AD HOC COMMITTEES (ANNUAL EVENTS)

Montrose County Fair Bluebird boxes auction
— Bruce Ackerman
Christmas Bird Count Team—Missy Siders
Eckert Crane Days— Alida Franco

Would you like to volunteer? Talk to an officer to see where we need help and where your talents can be used! We always need and welcome volunteers.

Eckert Crane Days – Thank You!

By Alida Franco, Eckert Crane Days Coordinator

Big thanks to all Audubon Members who helped with Crane Days! There were so many tasks to make this event a success. Thanks to those who distributed posters, assisted with guided bird watching, room set up and tear down, publicity, and many other details. Things work best when we work together!

Although the sandhill cranes did not know about the festival in their honor, they showed up and did their “crane thing “ on two wonderful spring days. The BBQ at the Western State Ranch was a big success as free food always seems to attract crowds. And our interactive session on Thursday night was great fun as we shared what sparked our interest in birds. Many attendees recounted wonderful childhood days and cherished people and family who enabled us to see why birds are so important to them. This proved to be a great bonding activity for Audubon members (we learned so much about each other) and we added a new and very enthusiastic member from Paonia and had an out-of-town visitor from Glenwood Springs. Word is getting out.

Thanks again to everyone.

Sandhill Cranes by Alida Franco

BCAS Environmental Education and Community Outreach Activities

by Carol Howe

Volunteers from Black Canyon Audubon Society have been busy with various environmental education and community outreach activities in the past few months. These include two presentations on Bird Migration, the Earth Action Celebration, Conservation Days, the Fourth-grade natural resource fair and Bring on the Summer. Many of these are annual events and volunteer opportunities. Reach out to Sheryl Radovich, Carol Howe, or Sallie Thoreson if you would like to help in the future.

Future Events

June 6: Delta Outdoor and Safety Day. Confluence Park. 10:00AM -1:00PM. (Janine Reid lead, needs 2-3 more volunteers). BCAS will have scopes and binoculars focused on Confluence Lake, osprey, and heron nests. Bird coloring sheets and bird buddy bracelets to give away.

Ridgway State Park Events

BCAS will partner with Ridgway State Park for several family-oriented events. If you want to help, contact Sheryl Radovich. In addition to the events listed below, Shelby Martinez, Naturalist (970.318.1799, ridgway.naturalist@state.co.us) is looking for volunteers to help with other activities.

June 13: Sky Pilots: Birds in Flight. Pa-Co-Chu-Puk, Ridgway State Park. 9:00 AM – 11:00 AM. Discover the secrets of how our local feathered residents navigate the skies, from the soaring majesty of eagles to the rapid-fire maneuvers of songbirds.

July 11: Grip it & Rip it: Raptor Talons and Tails. Pa-Co-Chu-Puk, Ridgway State Park. 9:00 AM – 11:00 AM. An up-close look at the high-performance engineering of nature’s most elite aerial hunters.

August 8: Jewels of the Air: The Hummingbird’s Secret Mission. Pa-Co-Chu-Puk, Ridgway State Park. 9:00 AM – 11:00 AM. This program reveals the "superpowers" behind the hummingbird’s impossible flight patterns and epic seasonal migrations.

September 8-18: Fall Migration Bird Banding. Dallas Creek Area, Ridgway State Park. We need volunteers to run educational stations for school groups about migration, habitat, bird adaptations, binocular use, and assist at the bird banding station.

Summer 2026 Field Trips

By Missy Siders

All Montrose trips meet at the public parking lot at the corner of N. 2nd Street and N. Cascade Ave. in Montrose unless noted in the trip description. Bring snacks, water, binoculars, and a field guide. Please RSVP at black.canyon.audubon.fieldtrips@gmail.com and specify which trip(s) you are interested in attending.

June

Montrose: 2nd Tuesday (Montrose County)

Tuesday, June 9 at 8:00 AM

Leader: Bruce Ackerman

A leader will accompany the group to a nearby birding hotspot. Return should be about noon.

Crawford State Park (Delta County)

Sunday, June 7, at 8 AM

Leaders: Daniel Hagaman, Janet Panebaker

Meet at Crawford State Park, 40468 Hwy 92, just outside of

Crawford. Explore Crawford State Park's diverse habitats in search of migratory songbirds, raptors, waterfowl, and other wildlife while learning tips for bird identification, behavior, and observation in the field.

Sponsored by Crawford State Park CPW Volunteer Raptor Monitor Team and Black Canyon Audubon Society

Billy Creek SWA with Sue Riffe (Ouray County)

Friday, June 12 at 8:00am

Use your musical vocabulary from the June 11 talk to identify bird sounds on this walk. Attendees must have a valid state hunting or fishing license or SWA pass available at [Purchase license for access to State Wildlife Areas](#) or at any CPW license agent. \$11.96/year for seniors! There is a limit of 24 participants! Sign up now!

Delta: 3rd Tuesday (Delta County)

Tuesday, June 16 at 8:30 AM

Leader: Dian Torphy

Meet in Delta at Confluence Park in the large parking lot next to the lake and near the intersection of Gunnison River Drive and Kellogg Street (behind Bill Heddles Recreation Center) at 8:30 AM. We will explore the woods and wetlands around the park. Plan on 2-3 hours.

Grand Mesa and beyond. (Delta/Mesa Counties)

Saturday, June 20 at 8:00 AM

Leader: Bill Harris.

We will bird several locations on the Grand Mesa to see the high elevation birds and then head to Mesa to view bobolinks. After we leave Montrose, we will stop at City Market in Delta at 8:45 AM, then the food market in Cedaredge at 9 AM. This is an ALL-DAY trip limited to 12.

Bluebirds at Ridgway State Park (Ouray County)

Saturday June 27 at 9:00 AM

Leader: Bruce Ackerman

Meet at the Ridgway State Park Visitor Center at 9:00 AM.

We will look in a few of the Bluebird boxes at various stages of nesting and fledging. We will also look for other birds. The Park has 50 Bluebird Boxes that are monitored weekly by volunteers. Ridgway State Park in June can host a variety of migrating birds, including ducks, gulls, shorebirds, and migrant songbirds. The park charges a \$10.00/car entrance fee unless you have an annual "Keep Colorado Wild" pass with your vehicle registration. We will try to carpool with annual pass holders to minimize expenses. There is no charge to go to the Visitor Center, but you must turn left before the entrance station. Bring water and lunch or snacks, and a spotting scope if you have one.

July

Montrose 1st Tuesday (Montrose County)

Tuesday July 7 at 8:00 AM

Leader: Bruce Ackerman

A leader will accompany the group to a nearby birding hotspot. Return about noon.

Ouray Area Birding (Ouray County)

Saturday July 11 at 8:00 AM

Leader: Don Marsh

Meet at Ridgway Visitor Center on Highway 62 near the Highway 550 intersection at 8:00 AM. We will head to Ouray and check several locations for breeding montane species, including Hermit and Swainson's Thrushes, Hammond's, Dusky and Olive-sided Flycatchers, Pine and Evening Grosbeaks, and Western Warbling Vireos. We will return to Ridgway around noon.

Field trips continued Page 5

Field trips continued from page 4

Delta 3rd Tuesday (Delta County)

Tuesday July 21 at 8:30 AM

Leader: Dian Torphy

Meet at Hotchkiss City Market in the parking area north of the store. We will carpool to Paonia River Park. Or meet at River Park at about 8:50. We will walk the paths along the North Fork of the Gunnison River. Carpooling from Delta may be possible. Plan on ~3 hours.

August

Montrose 1st Tuesday (Montrose)

Tuesday August 4 at 8:00 AM

Leader: Bruce Ackerman

A leader will accompany the group to a nearby birding hotspot. Return about noon. Simms Mesa Interpretive Trail on Dave Wood Road.

Simms Mesa Interpretive Trail on Dave Wood Road (Montrose)

Saturday August 15 at 8:00 AM

Leader: Don Marsh

We will walk along the trail in the ponderosa pines for a mile or two. Birds we might see or hear include Red Crossbill, Red-naped and Williamson Sapsucker, Gray, Dusky and Olive-sided Flycatcher, and Black-headed Grosbeak. Although the trail is well maintained, we recommend good boots with ankle support. Also bring water, snacks, and binoculars. We will return to Montrose around noon.

Delta 3rd Tuesday – Grand Mesa (Delta County)

Tuesday August 18 at 8:30 AM

Leader: Dian Torphy

Meet at Cedaredge Foodtown parking north of the store. We will carpool to Grand Mesa stopping at several birding spots. Plan on half a day.

I Love Blue Birds continued from page 1

Robert Ridgway (1850 – 1929) was a famous American Ornithologist (but no relation to Ridgway, CO). In 1867-69, he participated as a naturalist on major western exploration trips, from California through Nevada, Utah Territory, and Idaho Territory, before they became states. He was Curator of Birds for the

Smithsonian Museum from 1880-1929, a record 49 years. In 1886, he created an *Official List of Color Names* to standardize usage in Bird and Mammal names, in a hand-painted publication with color plates showing 186 colors. He codified most of the above names for colors. Because scientists described bird species in published black-and-white text documents, it was important that all the scientists used the same standard names for colors. This list of colors is still the standard for any official description of the colors of a bird. In 1912, he published a revised version entitled *Color Standards and Color Nomenclature* with 1115 variations on these colors.

BCAS Short notes:

- **We have some important news:** Beginning in July, our evening programs will be presented at Baldridge Hall, Montrose United Methodist Church, 647 South 1st Street, in Montrose.
 - We are sad to pass along the news that long-time member Betty Fenton passed away at the end of April. She was an avid birder and photographer and could often be found looking for rarities with her long lens.
 - BCAS will once again be auctioning Bluebird Boxes at the Montrose County Fair. The beautiful, clever, and ornate bird houses are the whimsical creations of the Montrose Area Woodturners and the Woodworkers Guild of Western Colorado, who donate them to Audubon. The proceeds are earmarked for our Audubon Education programs. Dates are Sunday July 19 to Saturday July 25, from set-up to take-down. We will need some volunteers to be at the booth each day in Friendship Hall. Contact Bruce Ackerman if you can volunteer for a few hours. BruceAckermanAUD@aol.com 727-858-5857
 - The BCAS Board of Directors voted to purchase a spotting scope and tripod to use on field trips and other club events. Any BCAS member may check out the scope by texting Todd Miller at 720-257-3819.
 - The bird bander at Ridgway State Park needs a place to stay while he is banding birds in September. Contact Sheryl Radovich if you can host him.
-

BCAS Monthly Meetings

Thursday, June 11, 7 PM, The Field House, 25 Colorado Avenue, Montrose

"A Different Way of Learning Bird Sounds"

by Sue Riffe

Sue Riffe is the owner of *She Flew Birding Tours* and has led tours to major hotspots in the US and in Colombia, Mexico, Ecuador, Panama, and Costa Rica. She specializes in trips for women. As a retired band director and professional musician, she has a unique understanding of bird songs and how to teach them to others. Sue will help us explore musical vocabulary to analyze bird songs we hear and will introduce different ways to learn these songs. The next morning, you will have the opportunity to use your newly gained musical vocabulary to identify bird songs, on a field trip to Billy Creek State Wildlife Area.

Friday June 12, 8:00 AM, Birding at Billy Creek State Wildlife Area with Sue Riffe

See the information about this field trip on Page 4 of this newsletter.

Thursday, July 9, 7 PM, New location!!

Baldrige Hall, Montrose United Methodist Church, 647 South 1st Street, Montrose

***"Circling Triglav National Park, Slovenia"* by Emily Schneider and Tom Wiard**

Tom and Emily spent three weeks exploring Triglav National Park in 2025 where they fell in love with the people, terrain, and birdlife. Slovenia is a global leader in conservation and has protected over 53% of its land. The country prioritizes biodiversity through strict management of forests, water resources, and wildlife, aiming for sustainable "green" tourism.

Tom and Emily have lived in Montrose since 1987 and had careers in medical fields. They love to travel, enjoying destinations in their own backyard as well as across the globe.

Alaska Brown Bear, Ursus Horribilus, Photo by Lisa Eckert

Thursday, August 13, 7 PM, Baldrige Hall, Montrose United Methodist Church, 647 South 1st Street, Montrose

***"History of Alaska's National Parks"* by Lisa Eckert**

On the historical national park timeline in Alaska, 1980 is a pivotal year. That year, the Alaska National Interest Lands Conservation Act (ANILCA) was signed into law. Considered the Louisiana Purchase of the American conservation movement, it more than doubled the size of the National Park and National Wildlife Systems. However, beginning in 1910, the establishment of Sitka National Monument, as it was called at the time, and four other units set up the foundation of what was to come.

"Touch the earth, reach the sky," is Lisa Eckert's personal mantra as she experiences the great outdoors. Lisa's 37-year career as a National Park Service (NPS) ranger and manager took her to fourteen NPS assignments across the country and included five years at Denali NP & Preserve. Additionally, she was selected for an international assignment in Croatia, managed the national NPS training center located at the Grand Canyon, and was superintendent at Colorado National Monument and Bryce Canyon NP. She is retired in Grand Junction.

Volunteer Don Marsh with students by Carol Howe

Conservation Conversations

By Sallie Thoreson

Are you smarter than a fourth grader?

Maybe...Five of us from Black Canyon Audubon Society plus a Bio Sci Tech from Curecanti NRA, spent May 12 at Riverbottom Park in Montrose with fourth grade classes from around the area. It was part of the annual 4th Grade Natural Resource Festival which featured booths from 20 different groups. At our station we talked about Gunnison Sage-grouse and habitat was a big part of the discussion. Fourth graders have studied this and can readily tell you about the components of habitat: food, cover, shelter and space, and they can tell you what these components mean for an individual species. Let us all keep thinking about habitat; check in with a fourth grader if you have any questions. Thank you teachers for leading the way, and to the students for paying attention!

Balloons are an Environmental Concern

By Sallie Thoreson

We all like to celebrate but let us do that without releasing any balloons! It is so difficult to keep balloons properly secured outdoors. Twice over the last couple of months, I have seen balloons break free of their moorings and take to the sky! Released balloons are litter and pollute many environments. Balloons may be carried long distances. A helium balloon may reach altitudes of 5+ miles and fragments can travel 100+ miles on wind currents. Once a balloon is in the air, it can travel from Colorado to oceans or other waterways.

Once in the water, a bit of brightly colored balloon becomes food for young birds which at best provides no nutrition, and at worst, can cause death through suffocation or starvation. Balloons that end up in oceans and waterways are 32 times more likely to kill seabirds than harder types of plastic debris. Pieces of balloons are among the most common types of waste found on beaches globally. Sea turtles and other ocean life have died due to balloon ingestion.

Mylar balloons are made of coated plastic and metal and are not biodegradable. Latex balloons can take 6 months to over a year to degrade. We know that microplastics and small particles from balloons pollute our air, drinking water and environment, causing harm to people. We are just starting to study the effects of microplastic pollution on birds, other wildlife, and humans.

Dead bird in balloon string.

<https://www.flickr.com/photos/50838842@N06/8080500892>

You might think balloon releases are only a problem near the ocean. However, Colorado sits at the headwaters of 4 major river systems that supply water to 19 states and Mexico. Balloon debris released here might not stay here — it may travel through our watersheds, harming fish, birds, and wildlife along the way. Closer to home, balloons that land on rangeland can be eaten by cattle, pronghorn, deer, and raptors.

As an aside, it may become more difficult to find helium to fill balloons. In a new twist due to our global economy, the blockade of the Strait of Hormuz has interrupted the transport of around one third of the global supply of helium. And helium is key to the operation of medical equipment such as MRI machines, electronics, semiconductors, and medical research.

So, celebrate that special outdoor event without balloons. Save them for indoor events where they can be responsibly discarded.

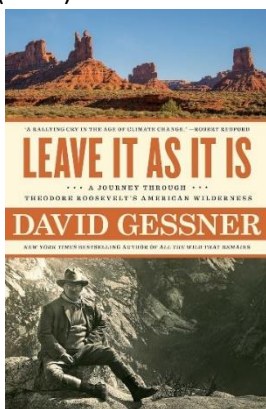

Northern Mockingbird by Verlee Sanburg

Upcoming Book Club Selections

By Sallie Thoreson

The **Black Canyon Audubon Book Club** meets the second Wednesday of the month at 3:00 p.m. Meetings are virtual (usually in the fall and winter) or in-person in Montrose (usually in spring and summer). In 2026, we are experimenting with hybrid meetings. Please join us, even if you have not read the book yet. Contact Bruce Ackerman at bruceackerman@aol.com to get the in-person location and/or the Zoom link. The full list of books for 2026 is on the BCAS website at blackcanyonaudubon.org

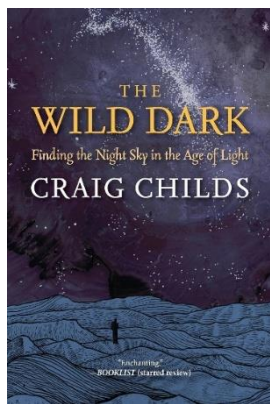

June 10. *Leave It as It Is: A Journey Through Theodore Roosevelt's American Wilderness* by David Gessner (2020)

This book tells the story of a road trip to revisit the wild places Roosevelt envisioned as our National Parks and why his efforts were so critical to our country both then and now. As well as creating five national parks and eighteen national monuments, Roosevelt set aside fifty-one federal bird reserves and four national game preserves, and, of course,

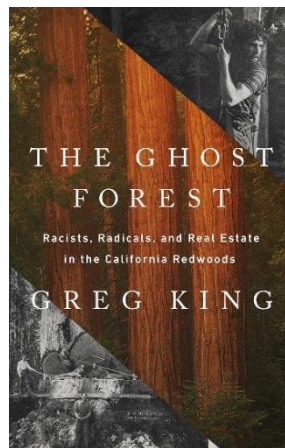

created the United States Forest Service and designated one hundred and fifty national forests.

July 8. *The Wild Dark: Finding the Night Sky in the Age of Light* by Craig Childs (2025)

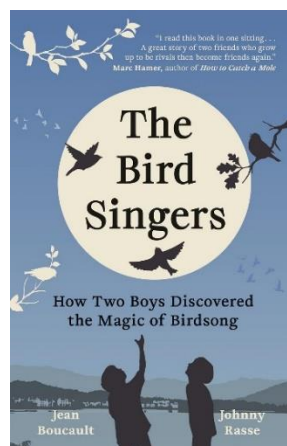

Seeking not darkness, but the presence of the universe, this master storyteller sets out to bike from the blinding lights of the Las Vegas Strip to one of the darkest spots in North America.

Aug 12. *The Ghost Forest* by Greg King. (2023).

The complete, well-researched history of how thousands of acres of California redwood trees were lost when politicians and wealthy companies manipulated the system while fronting as a 'save the redwoods' organization. We will both mourn and fall in love with these magnificent trees.

Sept 9. *The Bird Singers: How Two Boys Discovered the Magic of Birdsong* by Jean Boucault (2025).

This book follows two adolescent boys in France as they enter the world of bird singing competitions. The boys start as rivals, but their shared passion for birds develops into an enduring partnership to tour the world in concert as the Bird Singers. "There is poetry in the description of the different birds, from common seagulls to thrushes and bluethroats and nightingales. The Bird Singers is

the story of an unlikely friendship, sparked by a desire to speak with the avian world."

Motus Tower Update

By David Sinton

Spring migration through Montrose County has really picked up during the last few days. As of this writing, BirdCast estimates that over 2 million birds have crossed through Montrose County since March. However, our Motus tower has not recorded any tagged birds yet. Our Motus tower is one of six active stations on the Western Slope.

Fall is the busiest time for our station. All the detections so far were during the months of July, August, September, and October. Anyone can explore the data by going to motus.org and using the Explore Data tool. I am

BCAS Board Meeting Highlights

By Alison Brody, Secretary

The Board met on March 16th, 2026. We celebrated another successful and fun Annual Dinner and Meeting on March 5, attended by 72 people! The speaker, Christopher J. Preston, author of “Tenacious Beasts: Wildlife Recoveries That Change How We Think About Animals” was engaging and the talk illuminating. We received many enthusiastic comments about the evening and about Dr. Preston’s talk.

Sallie Thoreson distributed and received 75 signed postcards at the event in support of the Bird Habitat Stewardship Act! These will be presented to congressmen and women by the National Audubon Society.

The Board also discussed our current and future public educational programs. The BCAS Environmental Education program focuses on connecting a diverse community of learners with the avian world through public events, field experiences, and educational opportunities. We will continue to develop new programs and opportunities for members and the public to encourage wonder and appreciation of the natural world and the role of our feathered friends in natural communities.

We are grateful to Alida Franco and others for a tremendously successful “Eckert Crane Days,” to Sallie Thoreson and Carol Howe for putting on a great program on Bird Migration at the Montrose Library, and to Sheryl Radovich for her thoughtful development of new programs. We look forward to many more successful events in the future!

Treasurer’s Report

By Todd Miller, Treasurer

The BCAS checking account balance was \$30,726.50 as of May 14. With the May BCAS Board meeting, we will be kicking off a six-week budget cycle to determine the budget for the July 2026-June 2027 fiscal year. As part of that process, the Board will determine BCAS priorities and ask those responsible for BCAS budget line items to provide updated estimates for current fiscal year spending and proposed spending for the upcoming year. The treasurer, along with the budget committee, will then create an overall budget for Board review and approval by the end of June.
